	RE-ENTRY ACTION PLAN (REAP) FORM

INSTRUCTIONS: This form is used in preparing a proposed Re-entry Action Plan in applying to a Scholarship Program. Duly accomplished and signed forms will be submitted to the HRD Division along with the other documentary requirements.

Title of Scholarship Program:	JDS 23rd Batch Scholarship Program
Name of the Development Partner	Japan International Cooperation Center (JICE) through the National Economic Development Authority (NEDA)

I. REAP BACKGROUND AND INFORMATION	
a. REAP Title	<i>Upgrading Railway Stations accessibility through Integration of Policy Recommendations and Training Materials Based on Pedestrian Flow Analysis</i>
b. REAP Objective	<i>To train railway station supervisors in Metro Manila on the use of new accessibility guidelines and procedures based on pedestrian flow analysis by 2029. Trainees are measured by conducting Comprehensive Examination after conduct of training with the passing score of 70%. This training will directly support the implementation of recommended policy in railway stations in metro manila.</i>
c. Problem/Opportunity	<i>With the lack of guidelines in railway operators, and lack of training related materials in PRI regarding how to design foot traffic to avoid congestion inside the station, and how it affects the journey and safety of the passengers, there is an opportunity for the Philippine Railways Institute to study, and develop data driven policy recommendation regarding the standard station information system. With the long experience of Japanese in terms of managing foot traffic in their sophisticated railway network, and having an expert in transport engineering, they can guide me to design and improve accessibility in the railway station utilizing existing transport facilities.</i> <i>It is also an opportunity for PRI to create new topics regarding this in deep study analysis in station accessibility to be offered in capacity development training that is being offered by the institute.</i>
d. Description in relation to the Department	<i>Philippine Railways Institute (PRI) is a government organization focused on human resources development in the railway sector. This organization aims to improve railway services through continuous research, to provide quality training and develop high-caliber and competent railway workforce.</i>
i. Organizational Outcome	<i>This organization will benefit from this program by;</i> <i>• introducing new concepts in designing of station accessibility through available means of technology and international standard or best practices.</i> <i>•policy recommendation regarding standard on various information systems implemented at the station.</i> <i>This program can contribute to PRI achieving its goal to become a globally competitive and dynamic organization in shaping high-caliber and competent railway personnel.</i>

ii. Target Competency Improvement	<i>The program will enhance the knowledge and capability of the PRI instructors in delivering his mandate to share valuable in-depth knowledge in transport engineering.</i> <i>With their expertise to utilize existing transportation infrastructure; operation and management using simulation technologies, and utilizing researches on ITS (Intelligent Transport Systems) that enhances mobility by ICT (Information and Communication Technologies), It was expected that they can help to guide me to create ideas to solve station related foot traffic congestion by utilizing only existing infrastructure and by using applicable facilities such as way findings and signages.</i> <i>It will also give valuable data driven recommendations that will help to improve accessibility in stations.</i>
e. Relation to the Government's Development Plan	<i>This REAP focuses on improving railway station accessibility by;</i> <i>• in-deep study in transport engineering;</i> <i>• enhance the knowledge of PRI instructor by immersing on the international best practices and standard in designing accessibility</i> <i>• recommend related policy in improving accessibility</i> <i>The proposed research titled "Upgrading Railway Stations Accessibility through Integration of Policy Recommendations and Training Materials Based on Pedestrian Flow Analysis" is linked to the Philippine Development Plan. A key aspect of the Philippine Development Plan is enhancing transportation infrastructure to promote economic growth and ensure inclusivity.</i> <i>By focusing on upgrading railway stations, the research addresses critical issues related to accessibility, which is foundational for the development of public transport systems. Improved accessibility will not only facilitate better mobility for all citizens but also stimulate local economies and promote tourism, aligning with strategic priorities outlined in the development plan.</i> <i>Furthermore, the proposed research aligns with several Sustainable Development Goals, particularly Goal 9 (Industry, Innovation, and Infrastructure), and Goal 11 (Sustainable Cities and Communities). By conducting a thorough analysis of pedestrian flow, the research will help identify barriers to accessibility and propose policy recommendations that can be integrated into current urban transportation frameworks.</i> <i>These measures will provide more inclusive access to railway stations, benefiting marginalized groups such as the elderly, persons with disabilities, and lower-income commuters. As the Philippines works towards achieving the SDGs, this research is an essential step in promoting sustainable urban development and improving the quality of life for its citizens.</i> <i>Additionally, the research's relevance extends to "Pagtanaw 2050," a long-term vision that aims to create a more equitable, resilient, and sustainable Philippine society. This capacity-building approach aligns with Pagtanaw 2050's objectives of fostering a well-informed citizenry and resilient governance structures. Ultimately, the integration of these research findings will provide a roadmap for enhancing railway station accessibility, ensuring that the transport system contributes not only to economic growth but also to social equity and environmental sustainability in the Philippines.</i>

	RE-ENTRY ACTION PLAN (REAP) FORM

f. Direct Beneficiary	<i>General Public, Railway Operators, and Railway Personnel.</i> <i>General Public will also benefit because they can navigate the station premises based only on the signages and wayfinding so that they can travel faster, especially those not regular passengers.</i> <i>Railway Operators can also benefit. Having a smooth flow of passengers in the station resulting in passenger satisfaction will create passengers' loyalty.</i> <i>Railway Personnel, Station personnel particularly the station supervisor will join the training conducted by the PRI regarding the foot traffic management. They will learn the basic strategy in the implementation of the foot traffic management such as station layout, station signages/wayfinding and create a traffic flow plan that helps passengers Navigate inside the station.</i> <i>If the foot traffic management is being considered in the railway station premises, it gives smooth flow in the riding public, avoiding confusion, and eliminating station congestion.</i>
g. Gender Equality, Disability, and Social Inclusion (GEDSI)	<i>Aside from the regular passengers, women and marginalized groups such as persons with disabilities and indigenous people can benefit from the implementation of this REAP. All of those passengers can easily access the station without confusion and obstruction. They can find more clear wayfinding and signages whenever they are entering or exiting the station.</i>
h. Output	<i>The following are the general outputs of this REAP: is to Develop strategy in designing accessibility in the railway station, Recommend Policy standard with regards to the station information management, and Include to the capacity development training to be offered by the PRI, it will help to achieve the PRI goal to be produce high caliber and competent railway personnel and improve the Philippine Railway System.</i>
II. REAP TIMELINE AND IMPLEMENTATION	
a. Measurability	<i>This re-entry action plan will be implemented in four stages:</i> <i>Develop strategy in designing accessibility in the railway station</i> <i>Recommend Policy standard with regard to the station information management, and</i> <i>Inclusion to the capacity development training to be offered by the PRI and conduct of actual training.</i>

b. Sustainability	After developing the strategy in designing accessibility and inclusion on capacity development programs to be offered by the PRI, suggest to include it in the PRI curriculum to be more sustainable. Aside from this, the policy standard with regard to the station information should be implemented.	
c. Predictive Action Steps with Identified Success Indicators		
i. Phase/Stage	ii. Expected Output	iii. Timeline
Research and Analysis phase	•Ocular pre-selected stations to get necessary information such as station layout, expected volume of passengers. •Identification of congested areas in the station that may create build-up of passengers specially during rush hour. •Identifying needed signages that helps to ease passenger's foot traffic.	3 Months 1 month – survey nearest establishment (e.g. shopping malls) that may affect station crowd management 1 month – Record volume of passengers, the same time, days, 1 month – unexpected phenomena (weather)
Design and development phase	•Station layout mapping and suggested station information •Designing standard in signages and wayfinding's inconsideration of - Railway operators line color - Passengers with Special Needs	8 months 2 months - Station Information development 2 months – Simulation stage 4 months – Creation of Training materials
Implementation Phase	•Approved training presentation and Conduct of Training; •policy recommendation	1 year
d. Target Date to Start	January 1, 2027	
e. Target Date to End	February 28, 2029	
III. RESOURCES		
Estimate the budget you'll need (in pesos per budget item) to effectively implement your REAP. Include your plan for obtaining the required financial assistance.		
IV. COMMENT(S) AND RECOMMENDATION(S)		
a. Immediate Superior (Mentor)		
b. Head of the Office/Division/Service
